

ARK DEFAI

The Game Changer

Revolutionizing the Future with **Decentralized Finance** and **AI Innovation**

► **CLARIFY THESE TWO CORE QUESTIONS BEFORE GETTING INVOLVED:**

01

IS IT 【 SAFE 】 ?

- ✓ Does it have essential structures such as anti-drain mechanisms, backdoor prevention, and a transparent treasury?
- ✓ Can it prevent rug pulls, arbitrary token issuance, and black box manipulation?

02

IS IT 【 LONG-TERM 】 SUSTAINABLE?

- ✓ Does it have a sustainable token issuance and price stabilization mechanisms?
- ✓ Is it governed autonomously through protocol, rather than relying on hype, influencers, or airdrops?

► **SMART INVESTMENT PRINCIPLES:**

**INVESTING IS
NOT GAMBLING**

**CHOOSE A
TRANSPARENT
PROTOCOL**

**PROTECT
YOUR
INVESTMENT**

**IT'S ABOUT
THE PROTOCOL,
NOT SPECULATION**

BNB CHAIN

BEYOND BINANCE

BLOCKCHAIN BEP-20

BNB Chain is an open-source, decentralized blockchain ecosystem that combines the original Binance Chain (now the BNB Beacon Chain) and the BNB Smart Chain (BSC). It supports smart contracts, offers high speed, low transaction fees, and is compatible with Ethereum, allowing developers to build and run decentralized applications (DApps) for finance (DeFi), gaming (GameFi), and other Web3 services.

FASTEST BLOCKCHAIN

A 750ms Block Time,
Processing 100 Million
Gas Per Second.

SAFE & SECURED

Incorporating slashing penalties
to deter malicious behavior and
enhance network security.

TOKEN MINING

TOKEN MINTING PROCEDURE

(EM TOKEN ISSUANCE MODULE)

Crypto token minting is the process of creating new digital tokens and adding them to the total supply within a blockchain network, similar to how a government mints physical currency.

This process, often performed via a Proof-of-Stake (PoS) consensus mechanism, generates new units of cryptocurrencies or Non-Fungible Tokens (NFTs) by recording data onto the blockchain's distributed ledger.

Unlike crypto mining, which uses energy-intensive Proof-of-Work (PoW) to validate transactions, minting primarily focuses on the creation of tokens.
